1. Claims 1-13, 16-36, 38-39 and 53-54 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Referring to claims 1-10, 16, 17, 18-26 and 53, the prior art does not teach or fairly suggest a digital camera comprising an electronic processing section for processing the image data to determine the presence of one or more faces in the image; and wherein the electronic processing section utilizes a face detection algorithm having a first component and a second component; the first component comprising a pre-screening pattern recognizer that searches for image windows likely to contain faces, the first component having a first rate of false positives and determining a plurality of face candidates; the second component comprising a posterior probability function classifier, the second component having a second rate of false positives lower than the first rate of false positives, and processing the plurality of face candidates to determine the presence of the one or more faces in the images as recited in the claims 1, 16, 17, 18 and 22.

Referring to claims 11-12, 27-31 and 54, the prior art does not teach or fairly suggest a composition algorithm associated with the processing section for processing the face data and generating composition suggestions for a user of the digital camera in response to the processed face data as recited in claims 11 and 27.

Referring to claims 13, 32-36 and 38-39, the prior art does not teach or fairly suggest a digital comprising an orientation algorithm associated with the processing section for
